Art Unit: 3724

DETAILED ACTION

This action is in response to applicant's amendment received on 5/20/02.

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-2, 4-14 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 17, it is not clear what "it" encompass. The phrase "and/or" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. Also, it is not clear what "to push the panel along the table in a direction (F1; F3) opposite to the feed direction" encompass. Figures show the movable device pulling the panel in the direction opposite the feed direction, instead of pushing the panel.

Claim Rejections - 35 USC § 103

3. Claims 1-2, 4-14 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ess in view of Kindgren et al.

Ess discloses (Fig. 8) the invention substantially as claimed including a horizontal table 12, at least one panel 20, at least one movable device 15, a feed direction, a

Application/Control Number: 09/367,244

Art Unit: 3724

direction, a sawing device/a single lengthways cutting axis 10, rotation device (see Fig. 5), a plurality of pickup elements 17, guides, drive means and vertical direction (see col. 4, line 4-8). Ess doesn't show drive means to move at least one of the pickup elements in a horizontal direction independently of the other pickup elements. However, Kindgren teaches the use of drive means to move pickup elements 27-28 in a horizontal direction independently of each other for the purpose of moving the clamps themselves during adjustment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Ess's movable device by providing drive means to move pickup elements in the horizontal direction independently of the other pickup elements as taught by Kindgren in order to obtain work clamps automatically adjusted along the carriage with a relative simple and economical apparatus for physically moving the work clamps themselves during the adjustment.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. M. Fiedland et al., Scott, Hunter et al. and Schulze et al. are cited to show relate device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar Flores-Sánchez whose telephone number is 703-308-0167. The examiner can normally be reached on Monday thru Thursday between 8am and 5pm. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082.
